## ABOUT 10X

Our goal is to give investors more money at and in retirement. We achieve this by providing one optimal investment solution, and no competing choices. Three investment principles underlie 10X's life-stage portfolios:

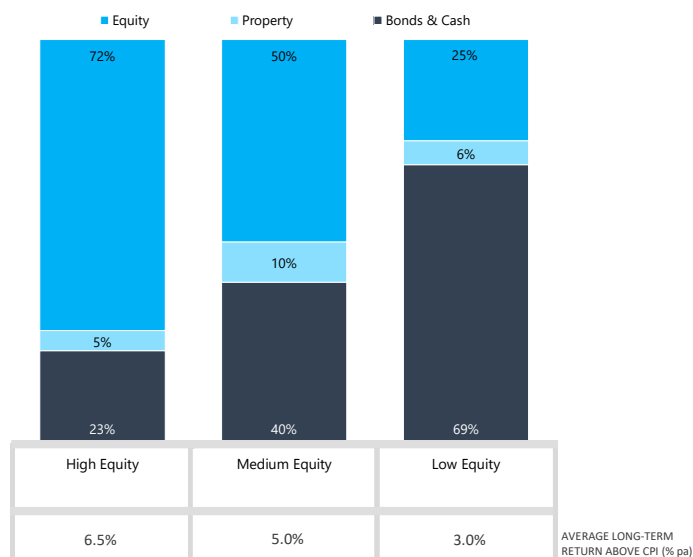

1. Time drives investment risk
2. Index funds
3. Low fees

## 01 | Time drives investment risk

At retirement, you may need your living annuity to last for 20 years or longer. Therefore, contrary to popular belief, most retirees are still long term investors and need to have a long term approach when managing their investments. Investment risk is linked to the term of your investments. The longer your term, the more time you have to ride out a drop in your investments. This holds true even when drawing an income from your investments.

A high equity portfolio is optimal for investments of 5 years or longer, as it maximises long-term returns. However over shorter time periods the returns of the High Equity Portfolio can be very volatile.

10X LIVING ANNUITY PORTFOLIOS<sup>1</sup>

## 10X LIFE-STAGE PORTFOLIO RETURNS VS INFLATION

| 10X PORTFOLIO | 1 MONTH | 3 MONTH | 1 YEAR | 3 YEAR | 5 YEAR | 7 YEAR | 10 YEAR |
|---------------|---------|---------|--------|--------|--------|--------|---------|
| High Equity   | -1.9%   | 1.7%    | 3.1%   | 3.6%   | 5.2%   | 7.2%   | 10.1%   |
| Medium Equity | -1.5%   | 0.4%    | 0.2%   | 2.4%   | 4.2%   | 6.4%   | 9.1%    |
| Low Equity    | -0.9%   | 0.3%    | 2.5%   | 4.4%   | 5.4%   | 6.7%   | 8.0%    |
| SA Inflation  | 0.2%    | 2.0%    | 3.1%   | 4.1%   | 4.6%   | 4.9%   | 5.1%    |

SOURCE: 10X Investments. Performance is before 10X's fee but after all other trading costs. All returns greater than 12 months are annualised. 10X Living Annuity returns are shown from Dec 2014 (when this product first commenced). Earlier returns shown are based on the same portfolio in the 10X Umbrella Pension Fund, which makes it possible for 10X to show this back tested data for illustrative purposes.

## 02 | Index funds

10X uses index funds as 3 out of 4 have historically outperformed active funds after costs.\*

An index fund owns the same basket of investments as the index and therefore earns the index return at a low cost. Active funds do not own the same basket of investments as the index and therefore returns differ from the index return, and costs are higher.

The 10X High Equity Portfolio has consistently outperformed the average return of large fund managers (BEFORE FEES) since inception (1 January 2008). 10X's total fees are generally half the industry average\*\* and so 10X saves most clients at least 1% pa (of the investment balance) in fees. We thus also show the average return of large fund managers reduced by a 1% higher fee to show the effect of the fee differential. Higher fees will always reduce the investment outcome regardless of market performance, however past performance is used here for illustrative purposes.

10X HIGH EQUITY VS. AVERAGE RETURN OF LARGE INVESTMENT MANAGERS SINCE INCEPTION (BEFORE FEES)<sup>1</sup>

SOURCE: 10X Investments, Alexander Forbes Large Manager Watch Global Best Investment View Median. Returns are based on R100 lump sum invested on 31 December 2007.

\* Profile Data, 10X, General Equity unit trusts, 5 yrs to Dec 2019, index fund assumed to be ALSI less 0.4% pa fee.

# 03 | Low Fees

10X charges low total fees to ensure investors save more of their money, and keep more of the investment return.

Consider two retirees; both purchase a living annuity at retirement and draw an initial income of 5% of their savings. The first retiree pays total fees of 2.85% pa (incl. VAT) for advice, administration and investments, which is not uncommon in the industry. The second retiree pays a fee of 0.86% pa (incl. VAT), which is the maximum fee charged by 10X on a sliding scale (where the larger your investment, the lower your fee).

If both retirees draw the same income and increase their income in line with inflation until their income reaches the 17.5% cap, the income would no longer keep pace with inflation thereafter. The chart shows that higher fees impact how long your income will last and keeps pace with inflation in each instance.

| Investment value  | 10X Fee pa incl VAT as a % of investments |
|-------------------|---|
| First R5 million  | 0.86%                                     |
| Next R5 million   | 0.57%                                     |
| Above R10 million | 0.40%                                     |

YEARS INCOME KEEPS PACE WITH INFLATION  
(5% PA INITIAL DRAW)<sup>2</sup>
